III. Course Description

This course provides the students training in community nutrition through implementing the knowledge and skills gained through pre-requisite courses and actively participating in community health/wellness groups such as schools, medical centers, villages and organizations. This training will enable the student to will practice how to develop skills such as critical thinking, implementing national programs and provide nutrition education to large groups. Students will be guided through self-directed problem solving, assignment and discussions and evaluation will be through written reports, field work assessment and oral presentation. Community nutrition course is a prerequisite course.

IV. Course Aims: this course is aimed to

1. Enable students to review relevant information about community-based nutrition and evaluate the nutritional situation in the community.
2. Expose students to various community-oriented activities.
3. Assist students to develop skills to plan and implement various communities' nutrition programs and services to promote health and wellness.
4. Prepare students to demonstrate communication and participation as a team with professional staff and interact in interdisciplinary professionals as a team.
5. Teach and guide students to prepare and present effective reporting skills.

V. Course Intended Learning Outcomes (CILOs) :

1. Delineate nutrition education materials that are culturally and age appropriate and designed for the literacy level of the audience.
2. Categorize health assessments/nutrition screening of persons, such as weight and height for individuals, groups and populations of differing ages and health status, in a variety of settings.
3. Propose and use procedures as appropriate to the practice setting to promote sustainability, reduce waste and reduce workplace hazards.
4. Conduct nutrition education in general on food and/or nutrition topic (class, pamphlet, instructional materials or written presentation).
5. Demonstrate behavior change strategies to promote health nutritional relevant to their situation (i.e. nutrition needs for workers, women on breast feeding/pregnancy/infant, children).
6. Perform the Nutrition Care Process and use standardized nutrition language for individuals, groups and populations of differing ages and health status, in a variety of settings.
7. Demonstrate active participation, teamwork and contributions in group settings.
8. Reporting of educational activities, class/bulletin board/pamphlet, and practices to supervisors and professionals through written reports and presentations.
